

Dear Bravo –

Shilo was 8 months old when she arrived in rescue. She had mange and they were treating her with several medications. But she didn't start to get better until they changed her diet to Bravo. The following pictures tell a sad story with a happy ending. Warning – the “before” photos will hurt your heart. The “after” pictures are one month after starting on Bravo.

Everyone who has watched the change in Shilo is thrilled with Bravo. Thanks for helping to save her.

Joanie P., TX
